Description of Coach business and expertise (150 – 200 words)

I have worked as an IT project coordinator and manager for 9 years. My experience includes working with both small and medium-sized businesses and social enterprises. My specialist area of expertise is helping business owners and social entrepreneurs with the development of ITC skills and performance. An important element of my activities includes proposing business solutions to SMEs, aimed at introducing and/or optimizing company informational systems, web-applications and individual software decisions for publicity, communication and training purposes.
