<b>Description of your business and expertise (150 – 200 words)</b>	
<p>I have a bachelor's degree in "International Business Management" and a master's degree in "Management of International Business Projects". I also have more than three years practical experience in this field. As soon as I obtained my master's degree, I began to intensively deal with the development and management of projects under the operational, national and other donor programs. During these years I have acquired not only professional knowledge and skills, but also experienced in consulting clients about various programs and funds, helping their business to be more successful.</p> <p>My professional experience has been gained in the NGO and private sectors. My work consists in consultations on operational and other donor programs and more specifically to: innovation, entrepreneurship and growth potential of SMEs, resource efficiency, sustainable and inclusive growth, urban development, tourism and cultural heritage, energy efficiency and human resources development. The huge volume of work helped me to improve my English skills and level of computer literacy, use daily legislative texts and make quality controls. Through my work with clients, I developed also some of my skills such as organization, dynamism, proactive approach, skills in team work, communication skills, seamlessly dealing with deadlines.</p> <p>My desire to work in this field arises from the challenges both to work in different spheres of activity and of accumulating skills in providing solutions for the required purposes. I am very motivated when I work in a team of profession with diverse and enriching methods of work to expand my knowledge.</p>
