### Description of Coach business and expertise (150 – 200 words)

I have worked as a business coach and training consultant for many years. My experience includes working with both small and medium-sized businesses and social enterprises. My specialist area of expertise is helping business owners and social entrepreneurs with the development of management skills and performance. An important element of my activities includes teaching managers how to be successful and to benefit from EU funding programmes in order to finance their corporate and organizational needs.
